KASTONE®
BRICK VENEER COLLECTION

EDITION 9

SUZUKA®

WALL FINISH PROFESSIONALS

SUZUKA® Malaysia belongs to the SUZUKA® Group, which holds manufacturing companies in Taiwan, Malaysia, and Thailand. As one of South East Asia's leading manufacturers in decorative building materials, SUZUKA® Malaysia's expertise in wall finishes dates back to its origins in the town of Suzuka, Japan, after World War II. Specializing in a wide range of stone veneers, waterproofing materials, and textured coatings, we offer durable products that are suitable for decorating and protecting both the interiors and exteriors of your homes and commercial buildings.

Not only do our products cater to buildings of various aesthetics and designs, but they also exceed international quality and safety standards. Armed with protection against UV damage, water seepage, dust, dirt and stains, we lower potential maintenance costs in the future. In addition to being an ISO 9001 certified company, we also carry a selection of SIRIM QAS certified products and a range of environmentally-friendly products certified by Singapore Green Label and SIRIM Eco Label.

Within the past decade, we've become an international supplier to number of regions, including Australia, Saudi Arabia, Thailand, Cambodia, Qatar, the United Arab Emirates, Bahrain, Indonesia, Singapore, and West Africa.

To experience why SUZUKA® products are trusted around the world, choose from our extensive range of coatings and artificial stone veneers.

Grouting Techniques

3 Choose your preferred grouting style or finishing.

A. Standard Grouting

1 Ensure the grouting level reaches half the height of the bricks.

2 Flatten the grouting with a stick.

B. Full Grouting

1 Ensure the grouting level reaches the height of the bricks.

2 Flatten the grouting with a stick.

C. Over Grouting

1 Ensure the grouting level protrudes slightly over the height of the bricks.

2 Use a sponge to smear the excess grouting across the edges of the bricks' surfaces.

D. Weep Grouting

1 Ensure the grouting level protrudes slightly over the height of the bricks.

2 Use a sponge to smear the excess grouting across the edges of the bricks' surfaces.

KASTONE® Installation

Step 1 - Wall Surface Preparation

- a) Hack uniformly across the wall (using a small axe, drill, or hammer) to create a rough and pitted texture on the surface.
- b) Clean the surface to ensure it is free from dirt and dust.

Step 2 - Mortar Application

Apply a generous layer of mortar across the wall using the notched edge of a trowel, creating a "combed" surface pattern.

Step 3 - Stone Application

Complete this step starting from the bottom of the wall & moving upwards: Apply a thick layer of mortar onto the back side of a stone. Press the stone firmly onto the mortared wall surface, holding for a few seconds. Repeat this until the section is completed with stones. Use spacers if necessary to ensure a level arrangement.

Step 4 - Grouting Application

- a) Once the stones are firmly affixed, clean the surface with a dry brush to clear the stones of any dust.
- b) Using a piping bag, apply KASTONE® Grouting between the joints. See the KASTONE® Grouting instructions for application details. Let dry.

Step 5 - Cleaning Up

Wipe the surface with a damp cloth or sponge.

Calculation of Wall Coverage:

Surface Dimension:

- A = 10' x 6' = 60 sqf
- B = 10' x 4' = 40 sqf
- C = 10' x 2' = 20 sqf
- D = 10' x 2' = 20 sqf
- E = 10' x 2' = 20 sqf

Total = 160 sqf

Example for BK-31 Series:

Flat = 160sqf - 2(10') (height of corners)
= 140sqf / 8.4' (coverage per box)
= 17 boxes (estimate total box)

Corner = 2(10') / 5.0' (coverage per box)
= 4 boxes (estimate total box)
